## Agenda Item 6 - Consideration of and possible action on reports from Texas Water Development Board representatives to Groundwater Management Area 15.

**Administrator Discussion:** on December 17, 2024, Katie Dahlberg of TWDB notified GMA 15 of its intended approach for developing the draft water demand projections for the next planning cycle (2031 RWPs) which is affected by the development of DFCs and the calculation of MAGs. Specifically, Ms. Dahlberg explained about the approach:

- "Acknowledging the mismatch in the DFC/RWP timelines, if DFC/MAGs are not coordinated with our draft projections development timeline, TWDB will use a rate of change approach based on the current irrigation demand projections (link below) in order to release draft projections to the Regional Water Planning Groups (RWPGs) by March 2027.
- RWPGs can request revisions to the draft projections, including the use of updated MAGs. However, to incorporate the updated MAGs into the final projections for the 2031 RWPs, MAGs would need to be available by August 2027. As you know, MAG development is dependent upon administratively complete explanatory reports and then subsequent capacity of TWDB groundwater staff."

Additionally, Ms. Dahlberg provided the following reference material:
